HEALTH DATA COLLABORATIVE

KENYA HEALTH DATA COLLABORATIVE (HDC) MISSION MEETING

One M&E framework for Kenya towards accelerating achievement of Universal Health Coverage

OVERVIEW OF THE ROADMAP

VENUE: - Intercontinental Hotel Nairobi

DATE 18/05/2016

Dr. Jackson Kioko
Ag Director of Medical Services

INTRODUCTION

- The roadmap is informed by;
  - Constitution of Kenya 2010
  - Kenya Health Policy 2014-2030
  - Kenya Health Sector Strategic Plan 2014-2018
  - Kenya National Vision 2030
- Overall roadmap for M/E in Kenya in the strategic period is defined in the *National M&E Framework*

COMPONENTS OF THE ROADMAP

- **Quick wins;** Priorities to be implemented under a rapid results initiative (RRI) and progress reported during upcoming Annual Health Congress in November 2016

- **Short term priorities;** Activities to be implemented in FY2016/17 and will be articulated in the AWP

- **Medium term and long term priorities;** Activities to be implemented in the remaining strategic period and within the KHSSP period - 2018

QUICK WINS

- Mid-term review of the Kenya Health Sector Strategic Plan
- Mid-term reviews of county specific health sector strategies
- Support for health sector annual performance reports
- Capacity building on DHIS2 at county level.
- Initiate the establishment of the Kenya Health Observatory with linkage to Global Health Observatory
- Improving civil registration and vital statistics
- Improving quality of care and performance improvement
- Establishment of sub national burden of disease

SHORT TERM PRIORITIES

- Review of health sector indicators and standard operating procedures (SOPs) manual
- Development of guidelines for M&E institutionalization
- Institutionalization of best practices for mutual learning and replication
- Linking data analytics to health research and policy agenda
- Roll out and implementation of the Kenya Health Sector M&E Framework 2014-2018
- Expanding ICT infrastructure for M&E/HIS at all levels
- Expand government investment in HIS/M&E for sustainability (esp. for AWPs, APRs, Basic ICT Infrastructure)

MEDIUM TO LONG-TERM PRIORITIES

- Support counties and health programs to establish robust M&E Units and M&E Systems

- Establish robust EHR systems in counties

- Improve HIS/M&E Governance in the entire health sector

- Establish a vibrant legislative and policy framework for M&E at national and county levels

- Establish ongoing mechanisms for enforcing mutual accountability for M&E commitments/regulations

AREAS FOR FURTHER STRENGTHENING

- Production of standard data tools

- Implementation of policy documents and standards at county level

- Culture of data use at all levels

- Data quality assurance at all level

- Data governance and coordination structures

EXPECTED OUTPUTS

- A unified sector wide vision for M&E and a comprehensive M&E /HIS plan with roadmap for implementation at all levels
- A shared platform created in sector promoting expanded data demand and use by stakeholders (public, private and civil society).
- Increased M&E capacity in health sector institutions
- A business case developed to advocate for increased investments in M&E capacity improvements in the Sector
- Expanded resource base to support core M&E investments (both technical and financial)
- Robust structures and mechanisms for improved governance and leadership for M&E
- A functional *Health Sector Observatory* in place with subnational and global linkages

---

Thank you
