

COUNTRIES

Definition of the constituency in the HDC

The countries constituency incorporates government representatives from countries that are currently actively engaged with HDC.

Constituency Membership

The constituency currently includes;

- Ministry of Health Kenya
- Ministry of Health Tanzania
- Ministry of Health and Wellness Botswana
- Ministry of Health Uganda
- Ministry of Health Malawi
- Ministry of Health Cameroon
- Ministry of Health and Population Nepal
- National Statistics Office Zambia (ZamStats)

Added value of the constituency in the HDC

The HDC Country Constituency is the driving engine for the HDC and is fundamental in achieving its mission and objectives. The HDC countries particularly support the HDC by:

- Having a data focal point within Ministries of Health or National Statistics Offices;
- Maintaining effective national coordinating and governance mechanisms;
- Guiding HDC global partners on contextualisation of global tools for national implementation;
- Strengthening accountability processes to those left behind and stimulate participation of all relevant stakeholders;
- Supporting approaches to contextualize global products and tools for the needs of local communities and increase use of data for planning and implementations at local levels.

Constituency focus 2022-2023

- Dissemination of data and digital priorities for HDC countries for partners to align behind and support.
