Added value of the constituency in the HDC

The HDC Global Health Initiatives Constituency plays a key role for the HDC to achieve its mission and achieve its 3 objectives (increasing capacity of HIS, aligning investments and contextualizing global tools) by:

- Supporting the collection, analysis and use of health data (especially in contexts with weak government systems and from communities) to guide policy, planning and budgeting;
- Supporting alignment of technical and financial resources at all levels amongst donors and partners.
- Supporting approaches to contextualize global products and tools for country needs and increase use of data for planning and implementations at local levels.

Constituency focus 2020-2023

- Strengthen national coordination mechanism to strengthen data governance
- Align technical and financial investments to nationally owned plans and budgets
- Document and share best practices in alignment and efficiency of technical and financial investments
