

Andrew Kwiringira (MOH), Nassan Natseri (WHO), Solomon Muhumuza (MOH), Paul Mbaka (MOH)

Country Overview

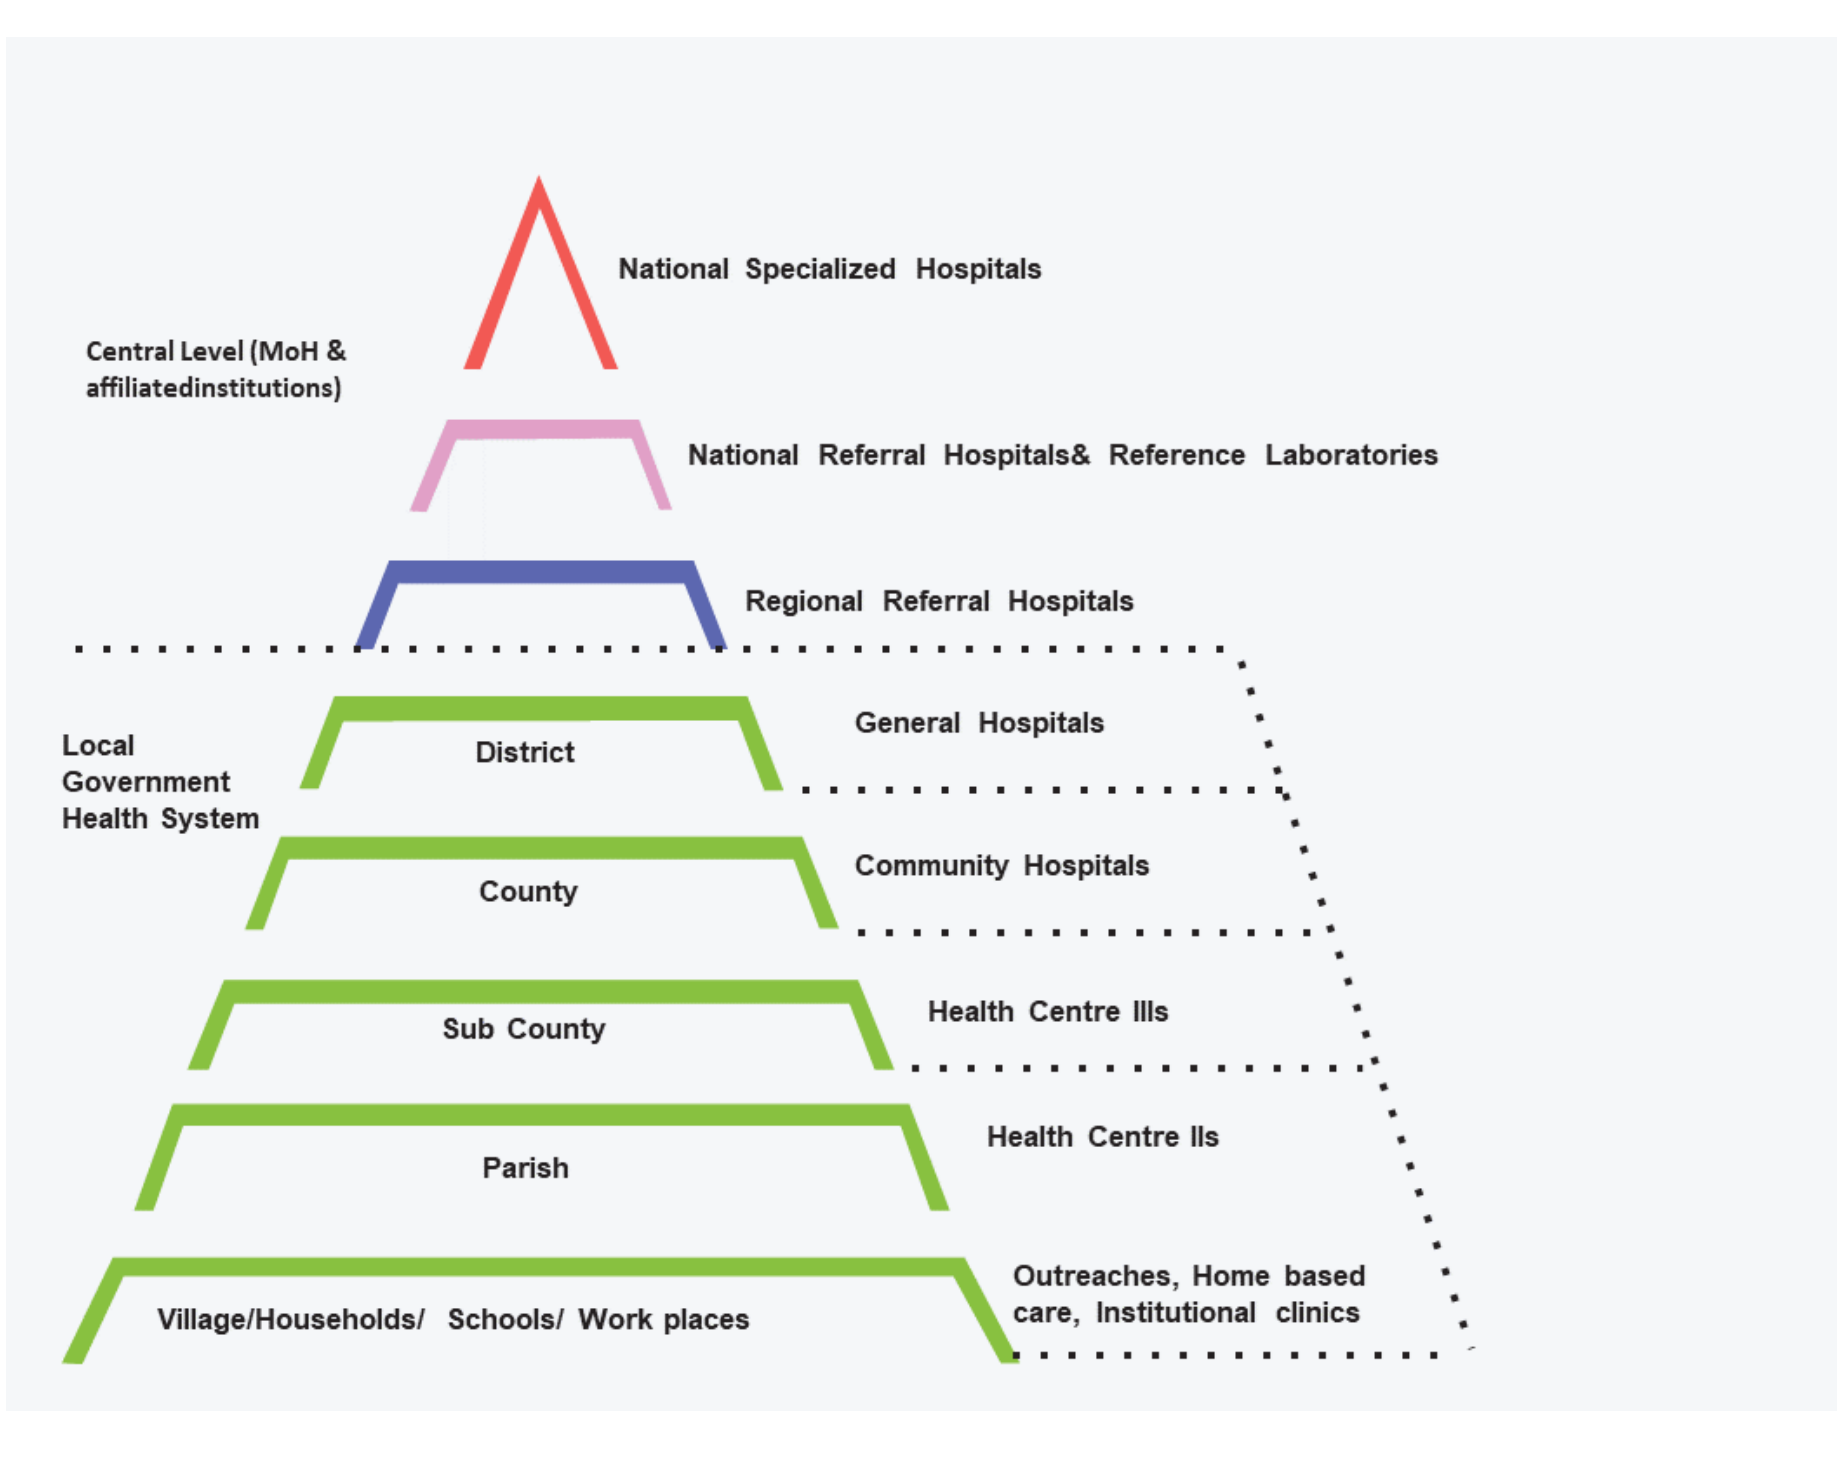

use selected indicators, e.g.:

Population	46 million
GDP/Capita	990 USD
THE/Capita	52 USD

Overview of the Health Information System

Organization of Health System

Status of HIS (use [SCORE](#) and other reports)

Use this table to fill in/highlight the status of the different aspects of HIS using SCORE

Surveys	CRVS	Optimizing health service data	Review of progress and performance	Enabling data use for policy and action
92.3%	28%	75%	YES	YES

Success

- Existing MoH Working Groups were mapped to the 7 HDC Working Groups
- The HDC, a sub-committee of HIIRE TWG, was established, with ToR and membership
- Partners meet monthly under the HDC sub-committee
- Working Groups meet weekly and report back to HDC sub-committee monthly and report back to the HIIRE TWG quarterly
- Working Groups have been able to align and mobilise resources – National ICT Assessment, Scaleup of eCHIS and System customisation, 1st Uganda National Digital Health Conference
- There is one sector M&E Framework

Bottlenecks and challenges

- Appreciating the HDC concept – Mapped existing WGs to HDC Thematic WGs
- Mapping stakeholders – Continuously reviewed and improved membership
- Operated virtually, with minimal physical engagements
- Capacity building of Secretariat and Chair teams

Why HDC?

- To Improve coordination
- To Unify planning, to avoid duplication of efforts
- To strengthening monitoring & evaluation processes
- To strengthening linkage of health information governance with mainstream MoH governance

Lessons Learned and recommendations

- Continuous engagement of stakeholders has clarified and helped to match the needs of both partners and MoH
- Consistency in meeting the WGs has led to a vibrant HDC
- Various resourceful documents have been reviewed or developed as a result of focused efforts in WGs

Partners supporting HDC in the country

- National NGO/CBOs:** IDI, RHU, URC, USAID RHITES, Medical bureaus, PACE Uganda, Living Goods, MakSPH METS, BRAC, HISP-Ug
- Bilateral/International:** CDC, Malaria Consortium, MSH, PSI, PMI, USAID
- UN:** UNAIDS, UNICEF, UNHCR, UNFPA, UNCDF, WHO

Top 5 HIS priorities for 2024-25

- Harmonise and coordinate of HI
- Monitoring and Evaluation of health sector performance
- Implement the Health Information and Digital health Strategy roadmap
- Innovative e-Health information solutions
- Building capacity in data analysis, synthesis, and production of Information products, including Digital microplanning with production of Annual Analytical health profiles and interactive dashboards

Actionable next steps

- Promote and facilitate greater alignment of investments (domestic and external resources) in one country health information system with direct technical assistance and support
- Explore and leverage opportunities to accelerate the implementation of HDC
- Identify challenges and obstacles that impede performance and opportunities to improve data systems for increased effectiveness and value for money
- Identify, document, and disseminate best practices that will contribute to scaling of HDC approach in the country
