

HDC Digital Health & Interoperability Working Group Objectives:

1. Optimize the meaningful use and reuse of health information technology in low and middle income countries to support achievement of SDGs through the implementation of foundational digital health infrastructures;
2. Actively promote the development, use, and long-term support of digital health 'global public goods'; and
3. Increase, in a measurable way, the level and alignment of country and partner investments in support of Objectives 1 and 2.

HDC Digital Health & Interoperability Working Group Shared Values:

Open:

- We are open, honest, and actively transparent in both our processes and our work together.
- We believe it's important to publicly document and share our knowledge, skills, experiences, and failures.
- We endorse and support the use of open health information standards, and work to apply them usefully within resource-constrained environments.

User-Centered:

- We respond to specific country and stakeholder demands, not our imagination.
- We design highly adaptable processes and technologies to work in the most challenging environments.
- We believe in upfront planning for sustainability.

Collaborative:

- We work collectively to prioritize and address the real world needs of our workgroup participants.
- We believe in the power of community, as the best ideas come from people with different backgrounds and talents
- We believe in harnessing the wisdom of our workgroup by creating a safe place to raise concerns, discuss failures, improve existing ideas, and solve problems.
